## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to because in Fig. 1-14, major components need legends. Fig. 2, "Prior Art" need to be added. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claim 2 is objected to because of the following informalities: line 2, "...has a housing (5) ..." in which (5) is not indicated in any of drawings.

Claim 5 is objected to because of the following informalities: line 2, "... a low power sensor unit ..." should be -- ...the low power sensor ... --.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 are rejected under 35 U.S.C. 102(b) as being anticipated by Struzik et al (US 6253610).

As to claim 1, referring to Fig. 1-1A, Stuzik et al disclosed a sensor system for monitoring fluid level having claimed limitations, comprising a power supply a signal sending unit 11 (i.e. sensor unit), a power supply 72 and a display unit 70. Referring to Fig. 15B, section 352 (of the system) further comprises adjustment control module 374 (col. 10, line 42-43). Still referring to Fig. 1, clearly the power supplier provides power (i.e. energizes) to the display unit 70 and the sensor unit 11 and simultaneously enables data communication between the display unit 70 and the sensor unit 11.

***Allowable Subject Matter***

Claims 12-22 are allowed. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
